

Mick Boggis Studios Master Metadata Form Automated Online Submission & Tracking System

<https://arferguiness.github.io/mbs-metadata-form/>

The Mick Boggis Studios Master Metadata Form provides a streamlined, web-based workflow for collecting comprehensive release, recording, and credit information directly from artists. Designed to live online, the form ensures that every submission is automatically processed the instant an artist clicks submit:

Emailed Notifications: Instant notification of new submissions delivered directly to Mick's inbox.

Google Drive Archival: Automatic storage and organization of submitted project data within designated Google Drive folders.

Google Sheets Logging: Centralized logging of metadata across structured spreadsheets for seamless tracking and validation.

Key Form Sections & Data Fields

The form is structured into standardized metadata modules aligned with DDEX RIN and industry specifications:

1. Project Overview

Captures overarching release information including Project Title, Project Reference/ID, Project Type (e.g., Album, EP, Single), Catalogue Number, UPC/EAN, and Record Label/Imprint.

2. Sound Recording & Audio Specs

Collects recording-level details such as Track Title, Subtitle/Version (e.g., Radio Edit, Remix), ISRC Code, Duration, Explicit Content Warnings, Language, Primary Genre, and SubGenre. Also tracks audio technical specifications including Sample Rate (Hz), Bit Depth, Channel Configuration, and File Format.

3. Session Details (Recording, Mixing, Mastering)

Records session types, dates, venue/studio names (e.g., Mick Boggis Studios), room identifiers, city, and country code to establish a complete production trail.

4. Contributor & Engineering Credits

Gathers full attribution for all performers, musicians, and technical personnel, capturing roles (e.g., Lead Vocalist, Recording Engineer, Mix Engineer, Mastering Engineer) alongside globally unique identifiers like International Standard Name Identifiers (ISNI).

5. Musical Work, Writers & Royalty Splits

Logs the underlying composition title, ISWC, original publisher, and individual writer names with their assigned roles (Composer, Lyricist), Performing Rights Organization (PRO) affiliations, ISNI/IPI numbers, and agreed percentage shares totaling 100%.

6. Rights & DSP Profiles

Captures Master Ownership (P-Line), Composition Copyright (C-Line), Rights Controller details, territory coverage.
